The Organizing Committee welcomes you to Geneva for Euroanalysis 2023, August 27th to 31st.

Euroanalysis is a biannual international conference of the Division of Analytical Chemistry of the European Chemical Society that attracts about 900 delegates. This 21st edition is locally organized by the Division of Analytical Sciences of the Swiss Chemical Society. It provides a forum for the European Analytical World to discuss the latest developments in analytical sciences. The theme of the 2023 meeting is

### Analytical Probing of Complex Systems

It reflects the urgent need to observe chemical changes in complex systems, from materials surfaces, to living cells and ecosystems, in real time and with adequate spatial resolution.

The conference is problem-oriented and has an interdisciplinary spirit. It brings together researchers that work in fundamental and applied sciences, but also decision makers and people intimately familiar with the systems of interest. It actively involves people from academia, federal research institutes, industry and regulatory bodies.

We very much look forward meeting you in 2023 for a fruitful and enjoyable time in Geneva.

Eric Bakker, Bodo Hattendorf, Franka Kalman and Marc Suter  
Conference Chairpersons

## Venue: The International Conference Centre Geneva
